---

### SUMMARY

Senior Software Developer with over 15 years of experience engineering scalable web solutions and high-performance interactive applications. I specialise in building robust, data-driven backends and sophisticated front-end architectures that prioritise technical reliability alongside seamless user engagement.

I am an engineer driven by the "puzzle" of development—thriving in the space where complex functional requirements meet performant technical architecture. I have a proven track record of solving high-stakes technical challenges, from architecting intricate data validation systems to implementing real-time interactive logic and state-driven interfaces. I am a versatile and collaborative problem-solver who excels at deconstructing intricate requirements into elegant, maintainable code. Committed to engineering excellence, I maintain a stack-agnostic approach, focused on identifying and implementing the most effective solution for any given technical puzzle.

---

### TOOLS

- Web Development: JavaScript, TypeScript, TailwindCSS, React, Node.js, Express.js, Vue.js, NextJS.
  - Databases & Data: SQL, PostgreSQL, DynamoDB, Data Modelling, XML/IDS Schema Validation.
  - DevOps: AWS (Lambda, IAM, S3, EC2), Git, CI/CD, Docker, Jenkins, BitBucket Pipelines.
- 

### EXPERIENCE

#### Wishbone Games, Cardiff — Software Developer Dec 2024 – Jun 2025

- Engineered high-performance interactive gaming experiences within a custom game engine environment.
- Focused on front-end delivery, ensuring high-fidelity animations and complex game mechanics were executed with technical precision.
- Optimised application logic and asset handling to ensure seamless performance on mobile devices and across low-bandwidth connections.
- Implemented dynamic visual systems, including intricate particle effects and transition animations, to enhance user engagement.
- Acted as a primary technical liaison between creative and engineering departments to translate visual concepts into performant code.

#### Cardiff University, Remote — Software Developer (Project: OpenBIM Data Validation) Jun 2025 – Aug 2025

- Developed a specialised JavaScript library designed to handle Information Delivery Specifications (IDS) for industry-standard BIM data requirements.
- Engineered high-fidelity data models by translating complex XML schemas into a suite of logic-driven classes to ensure architectural data validation.
- Engineered client-side processing logic within a modern framework environment, enabling high-speed, private processing of large data files directly in the browser.

- Built a custom error-handling system to detect schema violations and pattern mismatches, ensuring data integrity before reaching the storage layer.
- Utilised intelligent parsing and strict serialisation tools to ensure perfect "round-trip" data conversion between XML and object-oriented formats.

### **3Radical, Bristol — Full Stack Developer Nov 2017 – Dec 2024**

- Developed and maintained complex web applications to enable brands to effectively build and understand their audience.
- Designed and implemented user-friendly interfaces, enabling clients to effortlessly execute engagement campaigns.
- Built robust and scalable back-end systems and leveraged a broad range of cloud services to enhance application performance.
- Implemented security best practices and ensured compliance with data protection regulations.
- Collaborated closely with cross-functional teams to provide technical expertise and ensure successful project delivery.

### **Freelance, Cardiff — Full Stack Developer Jul 2017 – Nov 2017**

- Implemented web applications and websites using a variety of modern front-end tools and CMS platforms.

### **Reachal, Cardiff — Full Stack Developer Oct 2015 – Sept 2017**

- Took ownership of the development and maintenance of client-facing web applications.
- Built user-friendly and performant interfaces while contributing to back-end development and database management.
- Actively involved in the entire software development lifecycle, including continuous integration and deployment.

### **Volante, Bridgend — Web Developer 2011 – 2015**

- Developed and maintained company websites, user platforms, and custom admin panels with a focus on user experience.

---

## **EDUCATION**

### **University of Glamorgan, Treforest — BSc Computer Game Development 2007 – 2011**

- Built a strong foundation in game development principles and techniques, acquiring proficiency in programming and mastering development tools.

### **Coleg Glan Hafren, Cardiff — BTEC National 2005 – 2007**
